

Backbone Networks

The most important global backbone network providers trust Cologix data centers to on-ramp customer demand and take advantage of network neutral interconnection. Cologix offers natural access points throughout North America to address demand from metro and regional customers across 24 strategically located colocation data centers. Backbone networks also gain a natural location for PoPs to connect back to metro builds at the Internet's new edge.

COLOGIX BENEFITS

- o Backbone to backbone connectivity
- o Streamlined peering access to broad set of regional fiber networks & internet service providers (ISPs)
- o Direct connectivity to incumbent local exchange carriers (LECs) in each market
- o Direct connectivity to leading multiple system operators (MSOs), including 8 of the top MSOs in the U.S. & all 4 top MSOs in Canada
- o Presence in strategic markets at the Internet's thickening edge
- o Carrier hotel connectivity across 9 North American markets

BACKBONE NETWORKS THAT TRUST COLOGIX:

"Cologix has been a great partner for our expansion into Toronto by demonstrating a high-touch customer support model that made their customizable solutions and robust facilities even more attractive."

– Don MacNeil, Chief Marketing Officer, XO Communications

"We are continually growing our global network reach, and are pleased to take advantage of Cologix's Standard Connections offering. Leveraging Standard Connections allows us to offer our services directly to Cologix's growing customer base without significant risk, which creates an important on-ramp for us given the demand we expect to see from customers moving into their newly opened facility."

– Reid Fishler, Director of Carrier Services, Hurricane Electric
