CIRRUSHOSTING EXPANDS RELATIONSHIP WITH COLOGIX TO AUGMENT CANADIAN MANAGED HOSTING SERVICES

CirrusHosting, a leading provider of VPS hosting, cloud hosting, and dedicated server hosting, have announced an expanded relationship with Cologix, one of the foremost North American network neutral data center providers.

Markham, ON (PRWEB) May 14, 2014 – CirrusHosting, a leading provider of VPS hosting, cloud hosting, and dedicated server hosting, have announced an expanded relationship with Cologix, one of the foremost North American network neutral data center providers. CirrusHosting will leverage access to the reliable and scalable interconnection and colocation services of Cologix's Montreal, Toronto, and Vancouver data centers to augment their existing Canada-based [managed hosting services](#), colocation services, and private Canadian cloud management.

The growing relationship will allow CirrusHosting to accommodate the growing demand by Canadian business and government organizations for secure and private managed hosting services within Canada.

Building on IT and hosting infrastructure in Canadian data centers, managed by a vendor with a deep expertise in Canadian regulatory requirements, allows organizations to leverage the benefits of powerful managed hosting platforms with the assurance that their data is being handled in full conformity to legal requirements.

"Cologix is the leading network neutral data center provider in Canada which is important to us because leveraging their data centers allows us to ensure scalability and redundancy while gaining access to the best cost curve for the network services that make the cloud go," commented Cirrus CEO Ehsan Mirdamadi. "In addition, CirrusHosting are committed to helping our Canadian clients ensure their data is handled appropriately and our relationship with Cologix helps us to accommodate our rapidly growing client base without compromising our commitment to Canadian data sovereignty."

By partnering with Cologix, CirrusHosting is able to satisfy the hosting needs of Canadian organizations while providing an extensive choice of locations within Canadian jurisdictions, powerfully redundant managed hosting services, and flexible service level agreements (SLAs) customized to meet the needs of individual clients.

CirrusHosting provides a complete managed hosting solution for business and government agencies, including virtual private server hosting, enterprise and SMB cloud hosting, dedicated server hosting, and business collaboration and groupware hosting services, including Open-Xchange and Microsoft Exchange hosting, Microsoft Sharepoint hosting, and IP PBX hosting.
