

## **CLOUDOPS LAUNCHED NEW CLOUD.CA VIRTUAL PRIVATE CLOUD FROM COLOGIX'S MONTREAL DATA CENTRE**

*With Cologix providing the entire data centre infrastructure, CloudOps builds top quality products from the ground up*

**MONTREAL and DENVER – July 14, 2015** – [Cologix](#), a network neutral interconnection and data centre company, announced that [CloudOps](#), an award-winning hybrid cloud company and managed services provider, chose Cologix Montreal to support the launch of its newest offering, cloud.ca. This virtual private cloud is built on a longstanding, favourable and symbiotic relationship with Cologix, and is aligned with Cologix's newest, state-of-the-art Montreal data centre (MTL 7) at 1155 Robert-Bourassa.

For the full story, please read the [case study](#) on the Cologix website.

“For a cloud provider like us, finding the right data centre provider is a key decision,” noted CloudOps Chief Operating Officer Pierre-Luc Bisailon. “It’s like the foundation of a house – Cologix provides the infrastructure as a base layer for CloudOps to offer a top quality product that requires a top quality data centre. Cologix is also focused on colocation and not competing with us, which is important from the philosophy of true colocation partnership to support the strong growth of our business.”

To facilitate the [cloud.ca](#) introduction, CloudOps expanded into the MTL 7 data centre, which annexes the carrier hotel’s connectivity via Metro Connect services that ride the dark fibre ring that connects all seven of Cologix’s Montreal data centres. By outsourcing critical IT infrastructure to a professionally managed colocation facility, CloudOps can go to market faster with a fully resilient supply chain, all the way through to the power supply. This focus and flexibility is a differentiator for CloudOps in a rapidly evolving technology landscape.

“Cologix continues to build on the rich ecosystem that intersects in our carrier neutral data centres, so we are gratified these efforts contribute to the continued success of CloudOps and its new cloud.ca solution in particular,” said Cologix Canada General Manager Scott Adams. “CloudOps is able to leverage the stability of our infrastructure to reach a larger audience of on-net customers than they could anywhere else, and in the process add a unique offering to the underserved cloud market in Canada. We are happy to support CloudOps’ continued success as one of the fastest growing companies in Canada.”

### **About CloudOps**

Since 2005, CloudOps has enabled hundreds of enterprises and web-based companies to build their business in the cloud. Providing private, public and hybrid-cloud solutions for businesses seeking to

scale and for enterprises making their move to the cloud.
