

## FLEX Backup

AUTOMATED PROTECTION WITH INSTANT RECOVERY. FROM ENDPOINTS TO SERVERS.

*No matter what the cause is, lost data can cripple a business. Organizations of all sizes need to regularly protect and back up the important data that they depend on to avoid losses, stay compliant, and preserve data integrity. They also need the ability to rapidly restore files after a system failure or data loss to quickly get back to normal. Onsite data backup and protection systems typically eat up lots of storage capacity over a long period of time, and that can get expensive. And no business needs the hassle of continually swapping backup tapes, burning data onto discs, or manually running replication software.*

### FLEXBackup Highlights

- Easy, automatic, data protection
- Dedicated or Shared configurations
- Fully Managed with Unmanaged option
- Broad OS and Application support
- Online Management Portal
- No capital expense or IT staff

## PROTECT YOUR DATA FROM EQUIPMENT FAILURE, THEFT AND DISASTERS BY BACKING IT UP TO A SAFE, REMOTE LOCATION.

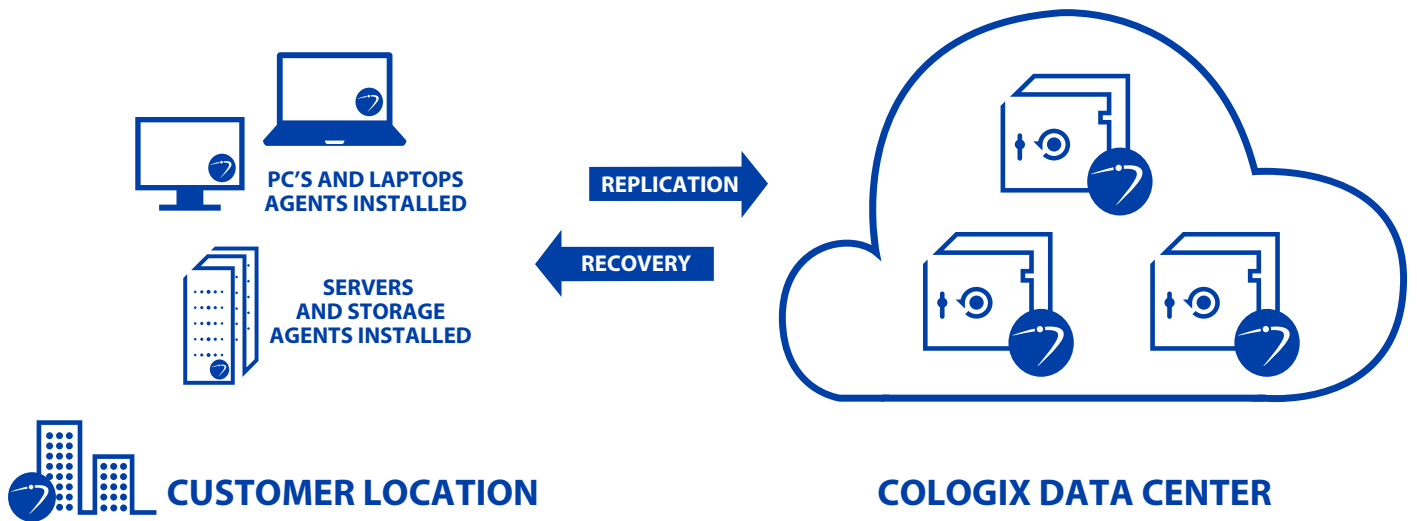

**FLEXBackup** from Cologix is a secure, automated, cloud-based solution that addresses all your data backup needs with one integrated service. It automatically backs up data from across your entire organization - from servers to laptops - to secure vault servers located at our data center. You have access to a web portal that allows you to configure, monitor and modify your backup policies, and to access and recover any of your data at any time. You also have the ability to back your data up locally before sending it to the cloud, and you can choose to utilize a geographically diverse vault to give you added protection.

Available as shared, dedicated or combined, this offering can be deployed as a complement to existing on-site office infrastructure, existing infrastructure within a Cologix data center or combined with any of our other **FLEXServices**. No matter the configuration, your data is protected using the highest security and reliability standards, and recovery is at your fingertips whenever you need it.

### OTHER BENEFITS OF FLEXBACKUP INCLUDE:

- Leverages proven, industry-leading technology from eVault and Seagate
- Highly Redundant Platform with up to 99.999 % platform accessibility
- Platforms supported include Microsoft Windows, Novell NetWare, Linux, Sun Solaris, HP-UX, IBM AIX, IBM i, and VMware
- Application supported include Microsoft Exchange, Microsoft SQL Server, Microsoft SharePoint, Microsoft Cluster Services and Oracle
- Bare Metal Restore (BMR) capabilities allow for the restoration of servers even when the environment has no functioning software or operating system.
- Compression and de-duplication of data reduces bandwidth utilization, network traffic, storage footprint, and backup windows.
- Advanced backup and recovery options include restoration to alternate machines or databases.
- Clients have the ability to back data up locally before sending it off-site
- Geographically diverse vault available to provide added protection
- Easy-to-use web portal allows users to instantaneously configure, monitor and modify all backup policies, and access and recover any lost data

## HOW FLEXBACKUP WORKS

- **FLEXBackup agents installed on designated computers, laptops and servers automatically collect data based on your specifications**
- **All data is compressed, de-duplicated and encrypted using an advanced encryption standard (AES-256)**
- **Data is transmitted over a secure internet connection to secure vaults in the Cologix data center**

## HYBRID BY DESIGN

Our hybrid platform allows you to create the best infrastructure to meet your specific needs

## ABOUT COLOGIX

Cologix provides reliable, secure, scalable data center and interconnection solutions from 24 prime interconnection locations across 9 strategic North American edge markets. Over 1,600 leading network, managed services, cloud, media, content, financial services and enterprise customers trust Cologix to support their business critical infrastructure and connect them to customers, vendors and partners. Our dedicated, experienced local teams and scalable solutions enable us to provide industry-leading customer service and the ability to successfully support customers at the Internet's new edge.
