

## FLEX Servers

DEDICATED HARDWARE HOSTED IN A SECURE DATA CENTER ENVIRONMENT WITH **24x7** AVAILABILITY

Cologix's **FLEXServers** are Dedicated Hosted Servers rapidly deployed within Cologix's New Jersey Data Centers and are available as fully managed hosting servers or as bare metal servers for customized operating system deployments via IPMI (Intelligent Platform Management Interface).

The FLEXServer service provides you with securely hosted dedicated servers that can be independently connected to the Internet or to your own network infrastructure within our data center creating a hybrid solution via private interconnects.

The Cologix FLEXServer service enables you the benefit of having dedicated hardware hosted in a secure data center environment with 24x7 availability. Our worry free service alleviates the concerns associated with day-to-day challenges of hardware maintenance and infrastructure uptime.

The FLEXServer service is ideally suited to address the security concerns associated with shared or cloud based solutions. Additionally, the service gives you the ability to run proprietary or customized applications without the overhead associated with capital expenditures (CAPEX) and purchasing and maintaining hardware.

### FLEX Server IPMI

Intelligent Platform Management Interface (IPMI) that enables a customer remotely access the bare metal server via the Internet and upload their own OS.

### Management Layer

Our management layer includes Cologix installed and patched OS, pro-active utilization reports, and access to the best sysadmins this side of the Mississippi River.

## FLEX Servers

FAST • SCALABLE • MANAGED

# FLEX Servers *(continued)*

Cologix **FLEXServer** is also available as a managed hosting service where Cologix deploys and maintains your choice of operating system on the customers behalf; 24x7 technical support is included.

With **FLEXServer** as a managed hosting service, you can also elect to utilize the IPMI (Intelligent Platform Management Interface) option to deploy and maintain your operating system on your own remotely, just as if you were physically present. Cologix would then provide the maintenance of the physical hardware, supply the power and connectivity, plus the provisioning of future upgrades using our expert staff.

### Generous Bandwidth

Each **FLEXServer** includes 20,000 GB (gigabytes) of data transfer per month to and from the Internet. Customers can purchase Dedicated Internet Access which can be pooled for all servers in the cluster as well as customer hardware in the data center.

### Location, Location, Location

The Cologix **FLEXServer** platform is hosted at our own data centers in New Jersey with private metro connectivity between all facilities and our NYC connectivity center, with multiple upstream Internet egress peering points in the tri-state area.

## HYBRID BY DESIGN

**FLEX Servers** are part of the hybrid platform at NAC, seamlessly creating the best infrastructure for your needs
