

FLEXVirtualDC

YOUR DATA CENTER ENVIRONMENT. OUR HARDWARE.

Cologix's New Jersey **FLEXVirtualDC** is a new way of delivering IT services. You have access to committed on-demand infrastructure resources - including compute, memory, storage and bandwidth - within a virtualized data center environment. This allows you to design, build and deploy virtual machines on-demand, and size-allocate resources as needed, all at a moment's notice.

FLEXVirtualDC Highlights

- 99.999% platform uptime SLA
- Based on VMware vCloud® technology
- High Performance Hardware
- Platform fully managed by our expert technical staff 24x7
- Secure web portal or API for easy resource deployment and re-allocations
- Monthly charges; no CAPEX requirements
- Available in resource blocks that include VCPU, RAM, DISK and Networking options
- 20TB Data transfer included
- HIPAA/HITECH compliant cloud infrastructure
- Hybrid capabilities—easily integrate with other Net Access FLEXServices

Enterprise Class Data Center—Available at the Click of a Mouse

Demand for IT infrastructure is growing at an unbelievable rate. Every minute of time waiting is an opportunity lost for your business. Between deciding on the right hardware and software, racking and stacking servers and configuring network equipment, deploying a new IT platform used to take days or weeks. Today, with **FLEXVirtualDC** from Cologix, each and every data center infrastructure component has been virtualized, so you can deploy anything from a small rack of servers to an entire data center - in seconds from the comfort of your office computer.

FLEXVirtualDC's pool of virtual infrastructure resources has been designed specifically for enterprise business needs. Those resources include computer memory, storage and bandwidth with the option to add **FLEXBackup**, **FLEXStorage** and **FLEXSecurity**—including firewalls, DDoS Mitigation and load balancers. For a true hybrid solution unique to your company's needs you can also combine **FLEXVirtualDC** with your **FLEXColo** and **FLEXServer** environments.

Allocate, Deploy and Adjust Resources at Anytime from Anyplace

FLEXVirtualDC enables you to build new servers, or virtual machines (VMs) quickly by uploading ones that are already running in your internal environment and create catalogs of standardized images for future use. Next time you need a similar configuration, it's as easy as dragging and dropping a copy of your previous deployment out of your personalized catalog. No need to buy new hardware to deploy a new application. Simply spin up a new application, and if needed, you can easily increase the capacity of your virtual data center on-demand.

Just as you would in your own data center, you can make these virtual resources available to applications, business units and projects as needed without having to worry about physical capacity. But with **FLEXVirtualDC** you now deliver this complete infrastructure virtually, speeding up the provisioning process and allowing IT to focus on forward moving business initiatives. And no matter how your resources are allocated initially, you can always re-adjust how much computer memory, storage or bandwidth you have, and you can grow and contract as needed without ever moving your workload!

FLEXVirtualDC

YOUR DATA CENTER ENVIRONMENT. OUR HARDWARE.

FLEXVirtualDC Solution

- Pay-as-you-go monthly fee (OPEX)
- Power & cooling included
- Fully redundant infrastructure
- Built-in enterprise level security
- 24/7 monitoring by state-of-the-art software included
- No maintenance cost; automatic upgrades
- Rapid deployment timeframe
- Easily and quickly scale as you grow

**PRICE
PREDICTABLE MONTHLY FEE**

VS

On-Premise Data Center Solution

- High up-front capital costs (CAPEX)
- Variable power & cooling costs
- Redundancy concerns
- Security is an internal responsibility
- Monitoring is an internal responsibility
- Maintenance and upgrade costs
- Lengthy implementation time
- Scalability requires additional hardware purchase

**PRICE
UNPREDICTABLE**

HYBRID BY DESIGN

Our hybrid platform allows you to create the best infrastructure to meet your specific needs

ABOUT COLOGIX

Cologix provides reliable, secure, scalable data center and interconnection solutions from 24 prime interconnection locations across 9 strategic North American edge markets. Over 1,600 leading network, managed services, cloud, media, content, financial services and enterprise customers trust Cologix to support their business critical infrastructure and connect them to customers, vendors and partners. Our dedicated, experienced local teams and scalable solutions enable us to provide industry-leading customer service and the ability to successfully support customers at the Internet's new edge.
