

Title: Sr. Developer

Location: Denver, CO

***** Open to qualified candidates outside of the Denver area*****

About our Company:

Cologix provides network and cloud neutral interconnection and colocation services in highly strategic and densely connected data centers. We enable customers to scale their businesses rapidly and cost-effectively by delivering flexible space, reliable power, and dense cloud and network connectivity to customers in the carrier, cloud, content delivery, media, financial services and enterprise communities. Our customers have direct access to our local operations teams which result in strong partnerships backed by exceptional operational support and unparalleled customer service. With 28 Data centers in the United States and Canada, Cologix offers space, power, cooling, cross-connects and physical security for its customers. We are headquartered in Denver, Colorado and have data centers in Columbus (3), Dallas (2), Jacksonville (2), Lakeland (1), Minneapolis (3), Montreal (10), New Jersey (3), Toronto (2), and Vancouver (2) where we provide local dedicated support teams for our colocation and interconnection customers. Our company is backed by one of the largest North American Infrastructure funds and we have huge growth ambitions.

About the Position:

We are looking for a remarkable Sr Developer who can drive delivery of solutions aligned with business objectives and our Product Roadmap. The successful candidate will be instrumental in rationalizing and realigning existing services and systems. You will work on the next-generation technologies that change how customers interact and manage their colocation services. Our strategy is to not just provide world-class customer service, but to revolutionize how colocation services are delivered. You will be an integral part of our small, high performing and innovative Technology team leveraging your extensive solutions-oriented implementation experience and your comprehensive understanding of Cloud technology to deliver unmatched business value. You will apply your expertise of the Cloud computing stack, broad software technologies, and open source tools to deliver first-time business value to internal and external customers.

What you do daily:

- Administration and configuration of the NetSuite CRM & ERP platform
- Build and run data integration strategies and solutions of Cloud NetSuite CRM with local database systems (Microsoft SQL)
- Configure Cloud NetSuite ERP & CRM platform. Customize NetSuite for specific Cologix business and colocation inventories and services
- Support ongoing administration of current systems including upgrades and conversions
- Develop code for the Cologix services platform-based applications and lead cloud application architectural design, trade-offs, and risk-mitigation considerations
- Deliver technical collateral including solution reference architecture, technical case studies, and functional prototyping
- Provide expert application design guidance for system integration partners on solution system designs, redesigns, performance optimization, and integration of new technical features and capabilities

What makes you a good fit: (Qualifications)

- Bachelors degree in Computer Science or Math (or related technical major) or equivalent practical experience
- Minimum 5 years in-depth knowledge of Cloud NetSuite ERP & CRM and related programming scripting languages – SuiteScript & SuiteTalk
- Minimum 3 years depth knowledge of Relational Database Management Systems (Microsoft SQL, Oracle, MySQL), SQL language, and RESTful API
- 5 years relevant experience in software development/solution engineering/technical consulting with expertise in architecting and rolling out new technology and solution initiatives
- Hands on experience with modern web technologies: HTML5, CSS, AJAX, JSON; and programming languages: CFML (ColdFusion), SuiteScript and SuiteTalk WebServices (Netsuite), SQL, JavaScript, Python
- Hands on experience with modern web applications frameworks for delivering web user interfaces: Sencha (EXTJS & Touch), Bootstrap and integrating them with Cloud CRM (NetSuite) and RDBMS (Microsoft SQL)
- Hands on experience with ETL (Extract, Transform, Load) applications
- Hands on experience with developing Web Services (SOAP, REST) using CFML meta language on ColdFusion platform
- Hands on experience with reporting technologies and platforms: SSRS, Tableau
- Strong communication skills and ability to work with multiple internal teams to bring projects to successful completion
- Ability to work on fast-paced, complex projects with tight deadlines

- Positive attitude and collaborative work style

NOTE: This job description is not intended to be all-inclusive. Employee may perform other related duties as negotiated to meet the ongoing needs of the organization.

Cologix is an Equal Opportunity Employer. Qualified applicants are considered for employment without regard to age, race, color, religion, sex, national origin, sexual orientation, disability, or veteran status.
