Title: Back End Developer / Software Engineer
Location: *Denver or remote*

About our Company:

Cologix provides network and cloud neutral interconnection and colocation services in highly strategic and densely connected data centers.   We enable customers to scale their businesses rapidly and cost-effectively by delivering flexible space, reliable power, and dense cloud and network connectivity to customers in the carrier, cloud, content delivery, media, financial services and enterprise communities. Our customers have direct access to our local operations teams which result in strong partnerships backed by exceptional operational support and unparalleled customer service. With 29 Data centers in the United States and Canada, Cologix offers space, power, cooling, cross-connects and physical security for its customers. We are headquartered in Denver, Colorado and have data centers in Columbus (3), Dallas (2), Jacksonville (2), Lakeland (1), Minneapolis (3), Montreal (10), New Jersey (3), Toronto (2), and Vancouver (3) where we provide local dedicated support teams for our colocation and interconnection customers. Our company is backed by one of the largest North American Infrastructure funds and we have huge growth ambitions.

About the Position:

As a member of the Cloud and Connectivity Business Unit at Cologix, you will be part of a talented group, dedicated to designing, building, and delivering a best-in-class, software-defined network (SDN) exchange platform, which will provide the next-generation of cloud connection and Meet-Me-Room (MMR) services to our customers. Working together, your team of cross-functional Developers, Network Engineers, Analysts, and Technical Specialists will turn customer feedback, competitive intelligence, and creative ideas into products and features that are open, accessible, completely transparent, highly efficient, wildly scalable, and incredibly effective. Collectively, you will be responsible for delivering a universal connection platform that is, to our customers, valuable, intuitive, and competitive. This is a top priority of the business, and as such, you will be expected to act as a customer advocate, ensuring that this is the solution that our customers both want and need.

We are looking for a Back-End Developer responsible for managing the interchange of data between the server and the users. Your primary focus will be development of all server-side

logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end designers. You will also be responsible for integrating the front-end elements built by your coworkers into the application. A good understanding of front-end technologies is therefore necessary as well.

What you do daily:

- Responsible for development of new production-quality, testable code using JavaScript and the Angular framework
- Collaborate with project stakeholders to ensure all requirements are met
- Support ongoing development for existing projects/application
- Ensure up-to-date documentation for systems, applications, and procedures

What makes you a good fit: (Qualifications)

- Bachelor's degree in Computer Science, Information Technology, Mathematics, Engineering or similar degree
- 4+ years of backend development experience
- Strong coding fundamentals: you're an expert in at least JavaScript with knowledge of other complementary languages such as Python and/or SuiteScript
- Deep experience working with RESTful APIs
- Web development experience (HTML, CSS, React, Angular)
- Experience with databases (PostgreSQL, MySQL, or similar)
- Experience with Git (Bitbucket and GitLab)
- Experience with Cloud – AWS, Azure, Oracle Cloud, Google Could or IBM Cloud is a bonus
- Experience with computer networking – including the OSI model, Routing/Switching, Ethernet, BGP peering, and/or standard network functions is a bonus
- Knowledge of Cloud NetSuite ERP & CRM and related programing scripting languages – SuiteScript and SuiteTalk is a bonus
- A drive to find the best solution for our customers

NOTE: This job description is not intended to be all-inclusive. Employee may perform other related duties as negotiated to meet the ongoing needs of the organization.

Cologix is an Equal Opportunity Employer. Qualified applicants are considered for employment without regard to age, race, color, religion, sex, national origin, sexual orientation, disability, or veteran status.
