

Cloud

The Future is @ the Edge of the Cloud

With as many as 80% of organizations predicted to migrate to the cloud by 2025, we know how vital cloud access is to your business. Cologix goes beyond mere access, providing a range of internal expertise—working closely with you to ensure a deployment that serves your precise needs.

As many as **84% of enterprises run on a multi-cloud strategy**. Our cloud-neutral Access Marketplace facilitates hybrid and multi-cloud deployments through software-defined interconnection with the large hyperscalers, while our interconnection ecosystem delivers over 250+ cloud providers and 450+ networks.

Challenges

Solutions

Rapid growth leaves most cloud providers unable to plan for upcoming space and power requirements.	Cologix data centers offer scalability and flexibility to cloud providers through a robust network & cloud ecosystem and strategic inventory deployment—scalable infrastructure tailored for performance.
The most significant issue facing cloud adoption is security.	Cologix offers a highly secure environment with a wide range of compliance and physical security.
Sustainability engagements continue to challenge large cloud providers.	Our Quebec hyperscale facilities offer low-cost green energy.
Rigorous cooling efficiency requirements and electricity availability is a challenge.	We offer 2N configuration, and our dedicated experts incorporate the latest technologies, anticipating our customer's needs now and in the future.

Stats

- 90% of companies use some type of cloud service
- Enterprises use 1,427 distinct cloud services on averages
- Demand for cloud services grows by 18% in 2019
- 69% of organizations will use multi-cloud environments in 2019. Cologix offers multi-cloud options in many markets
