

Enterprise

Fortifying your infrastructure for the next wave of disruption

The way enterprises are doing business is moving so fast that adapting to this ever-changing environment is challenging. They need to be closer to their end-users to improve experiences in a highly-competitive landscape and often turn to technology to solve these challenges. Enterprises want more data about their customers while also minimizing the risks and headaches associated with security.¹

Enterprises are offloading essential workloads to data centers to free up resources to pursue higher-priority activities that drive innovation and revenue rather than waste time on routine operations. And, enterprises are turning to data centers for cloud adoption and digital transformation. Cologix offers a wide range of cloud providers to help our customers make this shift.

Challenges

Keeping pace with the latest security best practices and managing a mix of on-premises infrastructure and cloud-based services is a significant challenge.

Ensuring room to grow in the future.

Delivering a positive, consistent customer experience with strict uptime and latency sensitive requirements.

Solutions

Cologix offers a highly-secure environment for our customers with a wide range of compliance and physical security in place in all of our data centers throughout North America.

Our seasoned team will help you design flexible solutions to maximize your storage needs and connect to a wide range of cloud providers through a private secure connection close to the edge:

- Explore hybrid infrastructure options
- Find at-the-ready stock inventory to expand and reach major cloud providers, with scalable infrastructure options tailored for performance

With 100% Uptime, 24/7/365, Cologix offers robust Meet-Me-Rooms with the lowest latency available, plus 450+ network and 250+ cloud providers.

Stats

- IT budgets rise as businesses replace outdated technology: 44% of businesses plan to increase tech spend in 2020, up from 38% in 2019¹
- Business adoption of AI-powered technologies is expected to triple by 2021, while adoption of edge computing is expected to double¹
- One in four enterprises (1,000+ employees) are increasing 2020 IT spend due to a recent security incident¹
- Two-thirds of large enterprises (5,000+ employees) plan to deploy 5G technology by 2021¹

Enterprise

Cologix Benefits

- Web-based portal for online support ticket submissions
- Cologix Command DCIM continually monitors service to ensure business continuity, alerting customers with options when nearing capacity
- Save an average of 35% on carrier services with our robust choice of 450+ unique networks offering high performance, redundancy & future-proofing
- Increased network reliability: the "last mile" from your equipment to a carrier's PoP is a cross connect away, not miles that are subject to fiber cuts
- Lower network latency to connect more eyeballs
- 100% uptime SLA
- Highly secure, technology-forward facilities where service providers & customers meet
- Cost-effectively scale IT infrastructure quickly
- Ease of doing business
- Strategically located hyperscale edge data centers
- Strategically located Disaster Recovery facilities
- Geographically diverse footprint outside of high risk zones
- Flexible & custom solutions and terms

Highly Strategic, Cloud & Network Connectivity-Centric Platform
