

Title: *UX/UI Front-End Designer*

Location: *Denver or remote*

About our Company:

Cologix provides network and cloud neutral interconnection and colocation services in highly strategic and densely connected data centers. We enable customers to scale their businesses rapidly and cost-effectively by delivering flexible space, reliable power, and dense cloud and network connectivity to customers in the carrier, cloud, content delivery, media, financial services and enterprise communities. Our customers have direct access to our local operations teams which result in strong partnerships backed by exceptional operational support and unparalleled customer service. With 29 Data centers in the United States and Canada, Cologix offers space, power, cooling, cross-connects and physical security for its customers. We are headquartered in Denver, Colorado and have data centers in Columbus (3), Dallas (2), Jacksonville (2), Lakeland (1), Minneapolis (3), Montreal (10), New Jersey (3), Toronto (2), and Vancouver (3) where we provide local dedicated support teams for our colocation and interconnection customers. Our company is backed by one of the largest North American Infrastructure funds and we have huge growth ambitions.

About the Position:

As a member of the Cloud and Connectivity Business Unit at Cologix, you will be part of a talented group, dedicated to designing, building, and delivering a best-in-class, software-defined network (SDN) exchange platform, which will provide the next-generation of cloud connection and Meet-Me-Room (MMR) services to our customers. Working together, your team of cross-functional Developers, Network Engineers, Analysts, and Technical Specialists will turn customer feedback, competitive intelligence, and creative ideas into products and features that are open, accessible, completely transparent, highly efficient, wildly scalable, and incredibly effective. Collectively, you will be responsible for delivering a universal connection platform that is, to our customers, valuable, intuitive, and competitive. This is a top priority of the business, and as such, you will be expected to act as a customer advocate, ensuring that this is the solution that our customers both want and need.

We are looking for a Front-End Designer who is motivated to combine the art of design with the art of programming. You will be responsible for drafting, designing and aiding in the development of a new customer portal.

What you do daily:

- Define the end-to-end user experience (UX), mock-up the layout and functions needed to bring that experience to life, and work with a team to build those elements into web-based user interface (UI) – all using input from the product, field, and development teams.
- Create User Interface layouts, designs, prototypes, mockups, and wireframes for applications, products, and/or services. Analyze user research data to evaluate designs and performance of existing user interfaces.
Ensure the technical feasibility of UI/UX designs
- Design new user-facing features
- Constantly iterate and improve our front-end
- Maintaining and influencing the brand guidelines of the customer portal
- Collaborate with other team members and stakeholders to ensure design specifications are feasible, scalable, and executed to a high standard.
- Assist in all stages of software development, including product development plans, testing, and delivery.
- Evaluation of 3rd party software solutions which could enhance the UX or UI

What makes you a good fit: (Qualifications)

- 4+ years of experience of developing web-based user interfaces
- Strong preference given to candidates who have previously developed enterprise grade customer portals
- An available online portfolio
- Familiarity with user interface patterns for web
- Familiarity with technical aspects of UX across mobile, web, and devices
- Experience with software development best practices (code reviews, SCM, build processes, testing, deployment, release and change management)
- Proficient understanding of cross-browser compatibility issues and ways to work around them
- Public Cloud services experience highly preferred (AWS, Azure, IBM Cloud, Oracle Cloud, GCP)
- Experience developing with a front-end framework like Angular, React, or Sencha (EXTJS & Touch) a plus
- Experience developing in at least one modern dynamic front end language a plus
- Constant desire for innovation, balanced with business needs and customer expectations

NOTE: This job description is not intended to be all-inclusive. Employee may perform other related duties as negotiated to meet the ongoing needs of the organization.

Cologix is an Equal Opportunity Employer. Qualified applicants are considered for employment without regard to age, race, color, religion, sex, national origin, sexual orientation, disability, or veteran status.
